Subject: Microsoft Settlement

As a taxpayer and citizen, I would like to add my name and that of the other members of my family in requesting that the DOJ finalize the proposed settlement agreement with Microsoft and move on with more important work and pressing issues.

In my opinion, this whole issue and that of AOL's pending lawsuit is nothing more than a continuing effort to stifle Microsoft's innovative efforts, and subsidize other non competitive companies at taxpayers expense. I am really tired of this issue, and would like to see some progress on behalf of consumers, technology, and the government.

These companies, AOL Netscape and others are working to defeat Microsoft's efforts to move on, and are using politics and the courts to futher their ambitions.

Lets all move on and devote our time to more rewarding work. Let the success or failure of private companies depend on their own efforts, not on their abilities to manipulate the DOJ and the courts.

Sincerely,

Jack Dwyer
